

PROVEN: HEALTHGUARD® AMIC COMPLETELY DESTROYS; HUMAN STRAIN SARS-COV-2 (COVID-19) ON TREATED TEXTILE

Prof. Damian Purcell, Head of the Molecular Virology Laboratory in the Department of Microbiology and Immunology at Doherty Institute for Infection and Immunity at The University of Melbourne commented:

“Our researchers in the Doherty Institute High level Biocontainment facilities have conducted many studies on numerous antiseptic agents for surfaces contaminated with SARS-CoV-2. The HealthGuard embedded treated fabric showed significant viricidal activity against SARS-CoV-2 within 10 minutes and completely abolished the ability for the virus to be infectious within an hour. This particular product has shown superior activity compared to other products tested.”
